ROTATING UNIONS

water steam air hydraulic hot oil vacuum coolant custom applications

Our aim: "To make every effort toward producing the best product of its kind on the Market".

This tenet serves as an incentive and an obligation in equal measure. Adherence to this policy has been responsible for our growth from a small garage shop to the world's largest manufacturer of Rotating Unions with a world-wide sales and service network.

Wherever water, steam, oil, coolant lubricants or other media have to be conveyed into or through turning machine parts, like rollers, shafts or spindles, rotating unions are employed in a wide range of industrial fields.

Developed in 1945, and continually improved as a result of practical requirements, **DEUBLIN** Rotating Unions are at the cutting edge of technology today.

DEUBLIN Rotating Unions - the industry standard. Our customers can rely on our engineering expertise, R&D capabilities, manufacturing techniques and more than 60 years of knowledge and experience.

Our product range is constantly being developed and expanded. In addition, we offer special solutions, customer specified variations and modular designs which enable us to provide users with the perfect solution for virtually any application.

Direct contact with customers and a close collaboration with the original equipment manufacturers provide the basis for continuous improvement.

Quality encompasses our entire enterprise. At **DEUBLIN**, reliable products at competitive prices and just-on-time deliveries are standards.

This, of course, requires an integrated total quality control system that is practiced in all areas of our organisation.

Quality is the result of teamwork!

DEUBLIN has its Corporate Headquarter in Waukegan, USA. For over 30 years the facilities in Germany and Italy have been producing for the European, African and Near Eastern Market.

Besides sales and warehouse facilities in almost every country in Europe, we also have company owned subsidiaries in Brazil, China, Germany, Finland, France, Italy, Japan, Mexico, Austria, Poland, Singapore, Spain, South Korea and the United Kingdom.

Our customers can rely on our worldwide manufacturing and sales & service network.

Due to its Total Quality Management System **DEUBLIN** was awarded its initial Certification pursuant to DIN EN ISO 9001 in 1996 by the German Standard Institute. In October 2002 the re-certification followed accompanied by the initial Certification for its Environmental Management System pursuant to DIN EN ISO 14001.

Certified as an **Authorised Economic Operator (AEO)** since **March 2009**, **DEUBLIN** has established that its supply chain is secure and customs-reliable. For its customers, it means faster flow of goods and materials. This is a significant advantage for **DEUBLIN's** partners worldwide.

DEUBLIN sets new standards.

Attention!

For applications exceeding given limits and/or unlisted rotor connections, contact **DEUBLIN** for engineering assistance. Please indicate media, size, speed (RPM), pressure, temperature and requested connection.

Please note our "Instructions of Hose Installation and Assembly of **DEUBLIN** Rotating Unions" on page 54.

- **Dimensions in mm.**

Subject to both technical and dimensional changes without prior notice.

Sealing

Original rotating unions used the media pressure to maintain seal contact. Logic indicates that as pressure increases, so do the forces holding the seals together - more pressure = tighter, better sealing.
This is why they were called "pressure joints".

However, more pressure on the rotating seal face also meant more friction, higher torque and more wear. The resulting service life was not satisfactory.

DEUBLIN was aware of the disadvantage and applied "Balanced Mechanical Seal Technology", a decisive improvement. This simply means the load or pressure on the seal faces is kept to a minimum regardless of media pressure, resulting in a freer turning union and in longer seal life.

Optimal balance ratio allows for a thin film of "lubricating" media between the seal faces.

In order to attain sealing in a non-pressurised system, the floating seal contact is maintained by the spring pressure (refer to sketch).

Keyed Floating Seal

Manufacturing

The entire **DEUBLIN** product range is manufactured at the cutting edge of technology from the very first drawing to the final production. Modern CNC machining centres transform highest quality materials into precision components. Cost-effective production is achieved by applying new technology and the most modern equipment.

Once assembled **EVERY** rotating union is dynamically pressure-tested for leakage as part of the final inspection procedure prior to despatch.

The core of a rotating union is the seal combination. Seal faces manufactured from tool steel, carbon graphite, bronze, ceramic, tungsten carbide or silicon carbide are micro-lapped to a surface finish of 0.025 RMS and an optical flatness of 2 light bands. To ensure the above specifications the near perfect flatness is tested under mono-chromatic light (refer to picture).

Micro-Lapped Seals

CNC Machining Centre

Thread Specifications used in this Catalogue

Symbol	Description	Symbol	Description
1/2 NPT	(American) National Pipe Thread	G 1/2	ISO 228 (DIN 259) Straight Pipe Thread
5/8-18 UNF	Unified National Fine Thread	M 22x1,5	ISO Metric Thread
1-14 UNS	Unified National Special	R 1/8	ISO 7/1 (DIN 2999) Pipe Thread (tapered external)
RH or LH	Right Hand or Left Hand	Rc 3/4	ISO 7/1 (DIN 2999) Pipe Thread (tapered internal)
Rp 1/2	ISO 7/1 (DIN 2999) Pipe Thread (cylindrical internal)		

Reliability

Years of experience, constant dialogues with customers, in-house and supplier innovations have enabled **DEUBLIN** to offer reliable rotating unions at the cutting edge of technology. The right seal combination compatible to the media guarantees the maximum service life for every particular application.

A clean and efficient warehousing and handling of the union is just as much a prerequisite for our customers as the adherence to the **DEUBLIN** specifications.

The market demands more products with a longer service life at more extreme parameters.

Besides new developments and the constant modification of existing products, it is above all better wear-resistant seal combinations that accommodate these market demands. **DEUBLIN** offers these seal combinations under the designation E.L.S. (Extended Life Sealing).

Service

For **DEUBLIN customer-orientated service** means: customisation and/or newly engineered unions for special requirements, an all-encompassing technical consultation by union selection either from the **DEUBLIN** facility or in the field by one of our representatives, short-term delivery of all selected components and, finally, fast troubleshooting of any and all problems.

Lengthy machine breakdowns are a thing of the past.

A broad assortment of unions is produced for stock and can be procured quickly. An automatic warehousing system enables all required components to be localised fast and effectively.

Lead times for special contractual products are only fractionally longer, for a modern and optimised production and assembly guarantee very short process times.

High-performance CAD systems warrant the realisation of special requirements such as the modification of an existing union or newly engineered designs. The customer receives in short notice the quotation including a technical drawing and price. The production of the rotating unions begins at that moment when the drawing has been confirmed by the customer and returned to the **DEUBLIN** facility.

Repair

Basically, all **DEUBLIN** Rotating Unions can be refurbished at the factory.

After they are returned, disassembly and cleaning begins and all worn parts are replaced with new ones. After assembly and testing, the customer receives back unions that are as good as new with an standard warranty.

When taking advantage of a warranty, the union must be returned UNOPENED. The cause of failure will be ascertained and, if so desired, the customer will receive a report for personal perusal. The result of the findings will decide whether the repair is performed on a charge or on a no-charge basis.

Numerous **DEUBLIN** products can be field repaired by the user. For every degree of wear there is a corresponding rebuilding or repair kit available. These kits can be ordered at the **DEUBLIN**

facility complete with their respective repair instructions (refer to comments under number system).

Number System

DEUBLIN ordering numbers for standard rotating unions consist of 2, 3 or 4 number groups. Each group describes a particular characteristic feature such as application, seal combination or rotor connection (refer to ordering example).

Rebuilding and repair kit numbers differ from their respective rotating union numbers by the insertion of a letter (B or C) which describes the extent of repair. The letter B stands for a rebuilding kit and the letter C for a repair kit (refer to ordering example).

All 54, 55 and 57 Series Rotating Unions are available for use in a potentially explosive atmospheres defined by "ATEX". Unions, that match the requirements for ATEX can be identified by an "X" between the first two number groups.

------------------	-------	-------------------------

DEUBLIN
Rotating Unions 57 Series
with Silicon Carbide Seals
for Water Service, DN 10 - 50
(Patented)

- monoflow and duoflow design
- self-supported rotating union
- radial housing connection
- balanced mechanical seal
- pinned rotor seal
- easy and quick replacement of sealing components (rotor seal, floating seal)
- ball bearings lubricated for life
- for poor water quality
- 3 vent holes
- forged brass housing
- stainless steel rotor
- special options:
 - threaded vent holes,
 - bearings splash proof,
 - nickel-plated versions

For further information please contact **DEUBLIN** or your local representative.

Seal Combination - Standard

- Carbon Graphite/Silicon Carbide
- long service life

Seal Combination - E.L.S. (Extended Life Sealing)

- Silicon Carbide/Silicon Carbide for severe conditions (poor water quality)

All 54, 55 and 57 Series Rotating Unions are available for use in a potentially explosive atmospheres defined by “ATEX”.

Torque Ratings 57 Series		
DN	ft.lbs	Nm
10	0.18	0.25
15	0.37	0.50
20	0.74	1.00
25	1.48	2.00
32	1.62	2.20
40	2.14	2.90
50	3.32	4.50

Union Repair

The 57 Series is designed for quick, easy replacement of both Floating Seal and the Rotor Seal.

The “57’s” seal is seated in a keyed counter bore at the rotor’s end. The worn seal simply lifts out and the new one drops right in. Since the entire rotor does not need to be replaced or relapped, the repair is fast, easy and on the spot. As you only replace the seals, the repair cost is very economical.

For Ordering Number of Repair Kit see page 5.

DEUBLIN

Rotating Unions 55 Series for General Purposes, DN 10 - 50

- monoflow and duoflow design
- self-supported rotating union
- radial housing connection
- balanced mechanical seal
- 3 vent holes
- forged brass housing
- stainless steel rotor
- special options:
 - threaded vent holes,
 - splash-proof bearings,
 - nickel-plated
 - and/or low torque design
- Lubrication Guide page 52

For further information please contact **DEUBLIN** or your local representative.

Operating Data

Max. Water Pressure*	Model 55 -555	750 PSI	50 bar
Max. Water Pressure*	Model 655	200 PSI	14 bar
Max. Saturated Steam Pressure (Intermittent)		14 PSI	1 bar
Max. Hot Oil Pressure		100 PSI	6,6 bar
Max. Speed, Rotors with Straight Threads:	Model 55 -255	3,500 RPM	3.500 min ⁻¹
	355	3,000 RPM	3.000 min ⁻¹
	525 -555	2,500 RPM	2.500 min ⁻¹
	655	750 RPM	750 min ⁻¹

Max. Temperature 120 °C > 120 °C consult **DEUBLIN**

* Pressures exceeding 8 bars only permissible with cold water (50°C max.)

Torque Ratings 55 Series		
DN	ft.lbs	Nm
10	0.25	0.34
15	0.35	0.50
20	0.50	0.68
25	1.25	1.80
32	1.25	1.80
40	2.50	3.40
50	3.00	4.07

Seal Combinations - Standard

- Carbon Graphite/Bronze for water
- optional:**
- Carbon Graphite/Ceramic for hot oil, hot water and saturated steam
- multi-purpose applications

Seal Combination - E.L.S. (Extended Life Sealing)

- Tungsten Carbide/Ceramic for severe conditions (poor water quality), max. temperature 90°C

All 54, 55 and 57 Series Rotating Unions are available for use in a potentially explosive atmospheres defined by “ATEX”.

Illustration shows duoflow with fixed supply pipe. Monoflow units have pipe plugs instead of an elbow.

57 and 55 Series - Monoflow Rotating Unions DN 10 - 50

Monoflow unions are used when supply and return lines are connected to opposite sides of the cylinder or roll.

57 and 55 Series - Duoflow Rotating Unions DN 10 - 50 for Threaded Supply Pipe

Duoflow unions are used when supply and return lines are connected to one side of the cylinder or roll; non-supported pipe lengths no longer than 4 x D2; max. speed 1000 RPM; for higher speeds divided supply pipes must be used (refer to page 11/12)

For rotating unions with pilot rotor, additional basic models and weight refer to page 8.

** DN 10 - 20 = hexagon
DN 25 - 50 = two wrench flats

57 and 55 Series - Duoflow Rotating Unions DN 10 - 50 for Divided Supply Pipe

Duoflow unions are used when supply and return lines are connected to one side of the cylinder or roll;
soldered supply pipe; non-supported pipe
lengths no longer than 4 x D2;
max. speed 3500 RPM;

For rotating unions with pilot rotor, additional
basic models and weight refer to page 8.

* supplied by customer

** DN 10 - 20 = hexagon
DN 25 - 50 = two wrench flats

DEUBLIN

Rotating Union for General Purposes, DN 65

Operating Data

Max. Water Pressure*	200 PSI	14 bar
Max. Sat. Steam Pressure (Interm.)	14 PSI	1 bar
Max. Speed	750 RPM	750 min ⁻¹
Torque at 120 PSI/8 bar	4 FT.LBS	5,4 Nm

Max. Temperature 120 °C > 120 °C consult **DEUBLIN**

* Pressures exceeding 8 bars only permissible with cold water (50 °C max.)

- monoflow and duoflow design
- self-supported rotating union
- radial housing connection
- balanced mechanical seal:
 - Carbon Graphite/Ceramic - standard;
 - Tungsten Carbide/Ceramic - E.L.S. (Extended Life Sealing)
- 4 vent holes
- cast iron housing
- steel rotor
- special options:
 - nickel-plated design
 - threaded vent holes
- Lubrication Guide page 52

For further information please contact **DEUBLIN** or your local representative.

Duoflow Rotating Union for Threaded Supply Pipe

Duoflow Rotating Union for Rotating Supply Pipe

DEUBLIN

Rotating Union 6000 Series for Water Service, DN 50 - 100

- monoflow and duoflow design
- self-supported rotating union
- radial housing connection
- balanced mechanical seal
 - Carbon Graphite/ Tungsten Carbide - standard and
 - Silicon Carbide/Tungsten Carbide - E.L.S. (Extended Life Sealing)
- steel banded floating seal
- easy and quick replacement of sealing components (rotor seal, floating seal)
- full-media flow
- vent slots
- cast iron housing
- steel rotor
- Lubrication Guide page 52

For applications above 120 °C please ask for information covering the new HT-series.

For further information please contact **DEUBLIN** or your local representative.

DEUBLIN Exclusive On-The-Machine Repair Cartridge

Seals are replaced quickly and easily. There's no need to remove hose connections or use special tools.

Make sure the system is cold and pressureless! Simply remove 6 hex bolts and end cap then remove floating seal cartridge and rotor seal face and replace with new seals.

Rotor seal is keyed and sealed to the rotor with a built-in O-Ring.

Replace end cap, hex bolts and safety wire. Detailed instructions available from **DEUBLIN**.

DEUBLIN

Rotating Union F Series for Water Service, DN 125

Operating Data

Max. Water Pressure* 150 PSI 10 bar
Max. Speed* 750 RPM 750 min⁻¹

Max. Temperature 120 °C > 120 °C consult **DEUBLIN**

* Operation at max. pressure combined with max. speed is not permissible
If operating conditions are marginal, please consult our Engineering Department

- monoflow and duoflow design
- self-supported rotating union
- balanced mechanical seal:
Carbon Graphite/Tungsten Carbide
- two widely spaced ball bearings
- labyrinth seal protects bearings
- nickel-plated cast iron housing
- high corrosion resistant
- steel flange rotor
- on-the-machine seal replacement capability
- inlet/outlet flange:
standard DIN,
optional ANSI, JIS
- special designs up to **DN 300** upon request

For further information please contact **DEUBLIN** or your local representative.

DEUBLIN

Rotating Union 54 Series Stainless Steel, DN 10 - 40

- monoflow and duoflow design
- self-supported rotating union
- radial or axial housing connection
- media contacting parts made of stainless steel (from 1.4571)
- full-media flow
- available for use in potentially explosive atmosphere defined by „ATEX

For further information please contact **DEUBLIN** or your local representative.

Operating Data

Max. Pressure and max. Speed see Diagram

Max. Temperature 71 °C > 71 °C consult **DEUBLIN**

Temperature > 71 °C - max. 90 °C only if
max. pressure ≤ 10 bar (150 PSI)

At temperatures > 71 °C (160 °F) media must be liquid (not vaporous)

Seals are Tungsten Carbide/Ceramic

Monoflow Rotating Union with Radial Thread

Monoflow Rotating Union with Axial Thread

* Adjust open vent downwards, or change one plug respectively

Operating Data

Max. Saturated Steam Pressure*	250 PSI	17 bar
Max. Temperature	400 °F	200 °C
Max. Hot Oil Pressure*	100 PSI	7 bar
Max. Speed*	750 RPM	750 min ⁻¹

Max. Temperature 230 °C > 230 °C consult **DEUBLIN**

* Operation at max. pressure combined with max. speed is not permissible

DEUBLIN

Rotating Union N Series

for Steam or Hot Oil Service, DN 10 and 15

- monoflow design: N10
- monoflow and duoflow design: N12
- self-supported rotating union
- large carbon graphite bearing
- pressurised spherical carbon graphite seal
- cast iron housing
- stainless steel rotor

For further information please contact **DEUBLIN** or your local representative.

DEUBLIN

Rotating Union 9000 Series for Steam or Hot Oil Service, DN 20 - 50

- monoflow and duoflow design
- self-supported rotating union
- spherical seal; lapped Carbon Graphite Rings
- seal wear indicator allows preventive maintenance
- 2 torque lugs on the housing
- nickel-plated cast iron housing
- steel rotor, nickel-plated for steam service

Available alternatives: New "HT" series.

For further information please contact **DEUBLIN** or your local representative.

Operating Data

Max. Saturated Steam Pressure*	150 PSI	10 bar
Max. Temperature	365 °F	185 °C
Max. Hot Oil Pressure*	100 PSI	7 bar
Max. Speed*	400 RPM	400 min ⁻¹
Max. Temperature	230 °C	> 230 °C consult DEUBLIN
For Ordering No. 9200-014 T _{max} = 200 °C		

* Operation at max. pressure combined with max. speed is not permissible

Duoflow Rotating Union for Steam

Type A
for short threaded supply pipe

Type B
for long threaded supply pipe
With additional brace nut for supply pipe. Use pipes as per DIN 2440 only.

Type C
for rotating supply pipe with packing seals to avoid interpassage leakage.

** Dimensions refer to page 25

Operating Data

Max. Saturated Steam Pressure	250 PSI	17 bar
Max. Temperature	400 °F	200 °C
Max. Speed	400 RPM	400 min ⁻¹

DEUBLIN

Rotating Union HPS Series for Steam Service in Corrugators, DN 40

- monoflow and duoflow design
- self-supported rotating union
- seals and outboard bearing made of impregnated Carbon Graphite
- convex seal ring reduces compression on Carbon ring; better suited to handle mechanical and thermal shock
- external mechanism to adjust siphon pipe through end cap
- nickel plated front and rear end cap
- nickel-plated ductile iron housing
- stainless steel spring
- heavy duty steel rotor design

For further information please contact **DEUBLIN** or your local representative.

DEUBLIN

Rotating Union H Series for Steam or Hot Oil Service, DN 20 - 125

- monoflow and duoflow design
- self-supported rotating union
- designed for steam and hot oil applications in paper, plastics and textile industries
- effective on a variety of applications, especially on open gear paper machines
- pressurised spherical carbon graphite seal
- Ni-Resist counterface
- two widely spaced graphite bearings
- H57 – H127 optional with sight glasses in the end cap for visual inspection of condensate removal
- seal wear indicator allows preventive maintenance
- flanged or threaded rotor available
- cast iron housing
- steel rotor

For further information please contact **DEUBLIN** or your local representative.

Operating Data

Max. Saturated Steam Pressure*	150 PSI	10 bar
Max. Temperature	365 °F	185 °C
Max. Speed*	DN 20- 50	180 RPM 180 min ⁻¹
	DN 65-125	400 RPM 400 min ⁻¹
Max. Hot Oil Pressure*	100 PSI	7 bar
Max. Speed*	DN 20- 50	350 RPM 350 min ⁻¹
	DN 65-125	400 RPM 400 min ⁻¹
Max. Temperature	230 °C	> 230 °C consult DEUBLIN

* Operation at max. pressure combined with max. speed is not permissible

The rotating unions of the H Series can be used with the **DEUBLIN** Siphon Systems. Rotating and non-rotating siphon systems can be customised to meet any/all requirements. For further information please refer to our catalogue "Rotating Joints and Siphon Systems for the Paper Industry" or contact **DEUBLIN** directly.

Duoflow Central Pipe Specifications

Rotating Central Pipe

R For rotating siphon (steam inlet pipe) the inner pipe is connected by means of a threaded bushing that screws into the rotor.

Rotating Central Pipe axial Movement

E For a rotating siphon capable of axial movement a sliding connection is made between the bushing and the central pipe to allow for the thermal expansion of the central pipe.

Recommended filtration of Hydraulic Oil: 5 µm

* Operation at max. pressure combined with max. speed is not permissible

DEUBLIN

Rotating Union 14000 Series

for Air and Hydraulic Oil Service, DN 10 - 50

- monoflow design
- self-supported rotating union or in-the-shaft mounted
- balanced mechanical seal
Carbon Graphite/Ceramic - for air service;
Tungsten Carbide/Ceramic - for hydraulic service
- axial or radial housing connection by means of elbow
- lubrication storage within the seal cavity for air service
- heavy-duty design
- steel housing
- stainless steel rotor
- full-media flow

For further information please contact **DEUBLIN** or your local representative.

Axial Version

X: Hole for Spanner Wrench as per DIN 1810, for sizes see table below.

In-the-Shaft Mounted Version

How to Order: Type a: 14037-03-094, straight-through version
Type b: 14037-03-094-118, with elbow

* DN 10 - 20 = hexagon
DN 25 - 50 = two wrench flats

Type c: 14037-03-094-120, in-the-shaft mounted version
Type d: 14037-03-094-121, with elbow and O-ring.

DEUBLIN

Rotating Union

for Air and Hydraulic Oil Service, DN 6 - 40

- monoflow design
- self-supported rotating union
- radial housing connection
- balanced mechanical seal
 - Carbon Graphite/hardened Tool Steel or
 - Carbon Graphite/Ceramic
- felt oiler in seal cavity for air service
- oiler for relubrication (3 - 5 drops/month)
- low torque
- weight optimised design
- aluminium housing
- stainless steel or steel rotor (respective of model)
- Lubrication Guide page 52

Operating Data

Max. Air Pressure	150 PSI	10 bar
Max. Vacuum	2" Hg	7 kPa
Max. Hydraulic Pressure*		
Model 1005	1,020 PSI	70 bar
1102	1,020 PSI	70 bar
1115	510 PSI	35 bar
1205	730 PSI	50 bar
2200	1,020 PSI	70 bar
250-094	1,020 PSI	70 bar
355-021	1,020 PSI	70 bar
452-000	730 PSI	50 bar
Max. Speed Straight Threads*	3,500 RPM	3.500 min ⁻¹
Model 250-094	3,500 RPM	3.500 min ⁻¹
355-021	3,000 RPM	3.000 min ⁻¹
452-000	2,500 RPM	2.500 min ⁻¹

Max. Temperature 120 °C > 120 °C consult **DEUBLIN**

* Operation at max. pressure combined with max. speed is not permissible

For further information please contact **DEUBLIN** or your local representative.

DEUBLIN Rotating Unions In-the-Shaft Mounted

To meet the specifications of engineering designs requiring minimum overhang, **DEUBLIN** can provide unions which can be mounted in the shaft. With these models the only extensions beyond the end of the shaft are the supply line connections.

Detailed drawings suggesting the application of these **DEUBLIN** Unions to your installation will be submitted on request and without obligation.

For additional models of In-the-Shaft Mounted Rotating Unions refer to page 33.

Model 1005-000-001, DN 6

Operating Data

Max. Air Pressure	150 PSI	10 bar
Max. Hydraulic Pressure	1,020 PSI	70 bar
Max. Temperature	250 °F	120 °C
Max. Speed	3,500 RPM	3.500 min ⁻¹

Available with all 1005 rotors shown on page 35.

Model 1005-000-049, DN 6

Operating Data

Max. Air Pressure	150 PSI	10 bar
Max. Hydraulic Pressure	1,020 PSI	70 bar
Max. Temperature	250 °F	120 °C
Max. Speed	3,500 RPM	3.500 min ⁻¹

Available with all 1005 rotors shown on page 35.

Model 1102-025-103, DN 8

Operating Data

Max. Air Pressure	150 PSI	10 bar
Max. Hydraulic Pressure	1,020 PSI	70 bar
Max. Temperature	250 °F	120 °C
Max. Speed	3,500 RPM	3.500 min ⁻¹

Available with all 1102 rotors shown on page 35.

Model 1115-130-205, DN 10

Operating Data

Max. Air Pressure	150 PSI	10 bar
Max. Hydraulic Pressure	510 PSI	35 bar
Max. Temperature	250 °F	120 °C
Max. Speed	3,500 RPM	3.500 min ⁻¹

Available with all 1115 rotors shown on page 35.

** Dimensions of Shaft Bore

DEUBLIN

Rotating Union D Series

for Water and Hydraulic Oil Service, DN 8 - 40

- monoflow design
- self-supported rotating union
- for hydraulic oil and water
- for swivel applications and high media pressure
e.g. for power steering applications on earth moving
equipment or hose reels
- steel housing and end cap
- stainless steel rotor
- can be adapted for other media upon request

For further information please contact **DEUBLIN** or your local representative.

Operating Data

Max. Hydraulic/Water Pressure	6,530 PSI	450 bar
Max. Speed	20 RPM	20 min ⁻¹
Max. Temperature	120 °C	> 120 °C consult DEUBLIN

DEUBLIN

Rotating Union AP Series for Water or Hydraulic Oil Service, DN 8 - 25

- monoflow design
- self supported rotating union
- designed for high media pressure and high RPM
- seals made of Tungsten Carbide
- double row ball bearing, lubricated for life (excluding ZAP)
- vent holes
- steel housing
- stainless steel end cap and rotor
- all parts in media contact are stainless steel and corrosion resistant

Operating Data

Max. Hydraulic/Water Pressure*	5,800 PSI	400 bar
Max. Speed*	1,500 RPM	1.500 min ⁻¹
Max. Temperature	90 °C	> 90 °C consult DEUBLIN

* Operation at max. pressure combined with max. speed is not permissible

For further information please contact **DEUBLIN** or your local representative.

DEUBLIN

Rotating Union

1379 and 1479 Series 4-Passage for Various Media

- Four independent passages for applications such as clamping and unclamping, work piece or tool sensing, and spindle cooling
- Vent between passages 2 and 3 allows use of two different media without cross contamination. For example, air in passages 1 and 2 and hydraulic oil in passages 3 and 4
- Stainless steel and brass components resist corrosion
- Hardened chrome sealing surface and elastomer-energized seals
- Dual, widely spaced ball bearings absorb large side loads

For further information please contact **DEUBLIN** or your local representative.

DO NOT RUN DRY

DEUBLIN

1116 Series “Closed Seal” Rotating Unions for Continuous Coolant Service

- Single passage for coolant or MQL
- Closed seals for transfer line and similar applications
- Full-flow design has no obstructions to trap swarf or debris
- Bearing-supported with threaded rotor for easy installation
- Deep groove radial ball bearings for smooth operation
- Labyrinth system and large vents to protect ball bearings
- Balanced mechanical seals made from silicon carbide for long life even under difficult operating conditions
- Anodised aluminium housing resists corrosion

DEUBLIN

Rotating Union 2400 Series for Water Service at Continuous Casting Steel Plants, DN 20 - 40

- monoflow and duoflow design
- in-the-shaft mounted rotating union
- flanged housing or mounted with retaining plates
- high-wear resistant balanced mechanical seal
Silicon Carbide/Silicon Carbide
- brass housings and elbows
- stainless steel rotors and supply pipes
- for poor water quality
- long composite bearing
- bearing protected by O-ring
- full-media flow

For further information please contact **DEUBLIN** or your local representative.

Relubrication Guide for DEUBLIN Rotating Unions

All **DEUBLIN** Rotating Unions are factory lubricated and tested, ready for installation. Unions not equipped with grease fittings are lubricated for the life of the union and require no further maintenance. Rotating unions, which are equipped with grease fittings, may require periodic lubrication to replace the grease which has dissipated. Overgreasing can be as damaging to the union as undergreasing, particularly in high-speed applications. Relubrication frequency and amounts of grease vary greatly depending on union size, operating temperature, rotation speed, moisture, etc. The following charts and table provide approximate lubrication frequency and amounts of grease for light and moderate service conditions.

When relubricating **DEUBLIN** Rotating Unions, use CHEVRON SRI GREASE NLGI 2. Only low-pressure grease equipment should be used to prevent damage to the bearings and seals. This is a general guide that should be used judiciously. The user must make adjustments as experience dictates. For more specific information, contact your local lubricant supplier.

Relubrication			
Model	Amount of Grease (g)	Model	Amount of Grease (g)
55	3,5	655	18
155	5,5	755	42
255	10	6200	18
355	10	6250	42
525	12	6300	68
555	18	6400	90

For further information please request our separate Lubrication Guide.

Relubrication Interval

Light Service

Temperatures up to 75 °C
little, if any, vibration or moisture (humidity)

Moderate Service

Temperatures 75 °C - 120 °C
some vibration and moisture present

Important Information

A *DEUBLIN* Union is a precision-made piece of equipment and must be handled accordingly. Sealing between the rotating device - rotor - and the static device - stator - is mainly accomplished via floating seals. Improper use could result in premature leakage or failure.

Although *DEUBLIN* Unions are of the highest quality and precision they are, by their very nature, a "wear and tear" product. It's important that they should be inspected periodically. Moreover, when seals wear out, the rotating union must be replaced or repaired to avoid subsequent leakage. Once a union begins to leak, it is paramount that the union be repaired immediately. Never work with leaking unions!

DEUBLIN Unions must never be used for applications other than those specified in the catalogue. It is strictly prohibited to use *DEUBLIN* Unions with hydrocarbons or other flammable media as leakage may result in a fire or explosion. The use of our product on exotic or corrosive media is strictly prohibited without our prior approval. For applications other than those stated in the catalogue, the *DEUBLIN* Engineering Department should be contacted for proper instructions. These instructions are provided by *DEUBLIN* as general guidelines and do not contain exhaustive information about the installation, use or maintenance of unions.

Operating instructions and installation manuals are available in the German and English languages for the greater part of *DEUBLIN* products. Buyers and users of *DEUBLIN* Unions should be certain that they have reviewed all of *DEUBLIN*'s product information. The operating and installation instructions must be strictly adhered to when installing *DEUBLIN* unions.

Factory Testing

All *DEUBLIN* Unions are factory-tested under pressure prior to shipment. This thorough check ensures that each single *DEUBLIN* Union is completely operational when you receive it and can - in most cases - be installed with no further consideration.

Warranty

The buyer's warranty rights assume that the product shipped be inspected upon receipt and all defects reported to *DEUBLIN* in writing immediately or for no longer than a period of 2 weeks. Hidden defects must be reported to *DEUBLIN* in writing immediately upon detection. The warranty is void when the *DEUBLIN* Rotating Union is tampered with or misused in any way. Otherwise, our General Terms of Sale and Delivery are valid. It cannot be emphasised enough that all dynamic seal components are wear parts.

DEUBLIN will not be held liable for damage resulting from improper use, incorrect warehousing, incorrect transport, faulty assembly, faulty operation, insufficient maintenance, incorrect handling, improper installation by the customer, the use of inappropriate accessories or spare parts and natural abrasion. Please request our General Terms of Sale and Delivery.

Lubrication and Maintenance

Depending on the *DEUBLIN* product series and the operating parameters all *DEUBLIN* Unions are lubricated for life or have to be relubricated or serviced according to specially defined intervals. Please follow the respective operating instructions or the general "Relubrication Guide" for *DEUBLIN* Rotating Unions.

Filtering

The service life of the seal is largely determined by filter quality and thus of vital importance for the perfect operation of the rotating union. We recommend a filtering of min. 60 µm. It goes without saying that all installation and operating instructions must be carefully reviewed and strictly adhered to.

Repair Service and Maintenance of *DEUBLIN* Unions by *DEUBLIN*

Use only *DEUBLIN* spare parts for repair of the *DEUBLIN* Rotating Unions. Prior to repair contact *DEUBLIN* or any authorised *DEUBLIN* representative. You can find a local *DEUBLIN* representative at the following internet site: www.deublin.com.

Most unions can be reconditioned in the field by use of *DEUBLIN* Repair or Rebuilding Kits (see page 5). Generally, we recommend having the *DEUBLIN* Rotating Unions repaired by *DEUBLIN*. Repair Service is available at all *DEUBLIN* factories. Factory rebuilt unions carry a "New-Union-Warranty".

Tension-free Installation

When installing rotating unions, special attention has to be paid to a flexible and tension-free hose connection. For further suggestions please refer to our installation instructions.

NPT → G (BSP) Stainless Steel Adapters

Due to worldwide interchangeability most *DEUBLIN* Unions are equipped with NPT hose connections. Make use of our NPT/G (BSP) adapters if you wish to fit hoses with G (BSP) threads.

Instructions of Hose Installation and Assembly of *DEUBLIN* Rotating Unions

Example Rotating Union 55/57 Series

Example Rotating Union 1109 Series

Additional Catalogues with Customised Applications for Special Industries

Machine Tool		High Pressure Hydraulic	
	Rotating unions for air, hydraulic, coolant, cutting oil and oil/air mist lubrication service in machine tools, machining centres, transfer lines and special machines		Monoflow and duoflow rotating unions in wind and water power plants as well as in coil winding plants; optional with central passage for slip ring
Continuous Casting		Hot Media	
	Rotating unions for water service to cool the caster rolls in continuous casting plants and rolling mills; bearingless unions available		Rotating unions for water and hot oil services in various applications in the plastics and other industries
Paper		Special Solutions	
	Rotating unions for steam and hot oil service for paper manufacturing; siphon systems and turbulence bars for the paper industry	Special rotating unions, customised versions and modular designs for various media and applications	

Since its establishment in 1945, *DEUBLIN* has consistently adhered to a policy of producing the best product of its kind in the market. The result of this policy has been constant growth through the years. For this progress we are grateful to our many loyal customers.

We cordially invite you to visit our modern manufacturing facilities in Waukegan, Illinois; Hofheim-Wallau, Germany; Monteveglio, Italy and Dalian, China.

Sincerely,

Donald L. Deubler
Chairman of the Board
